Contact card

TAX

Helping you manage the complexity of R&D taxation, incentives and commercialisation issues.

KPMG's Research & Development (R&D) group is a professional team assisting a diverse range of local, national and multinational clients in the tax aspects of research, development, management and commercialisation of technology.

The group is a national practice of advisers with diverse technical backgrounds who are focused on R&D and commercialisation issues.

Our team is experienced in obtaining government funding and advising on complex issues involved with the conduct of large R&D projects. We deal with tax aspects of technology development, from conceptualisation to commercialisation, across a wide range of industries.

Our clients cover industries including:

- energy and natural resources
- plastics and chemicals
- manufacturing
- banking and finance
- agriculture, dairy and viticulture
- food processing
- biotechnology
- forestry and wood panel manufacturing
- aquaculture
- mining
- environmental engineering
- heavy and light engineering
- information systems, electronics and telecommunications.
